

JON RENZO TOLEDO

Pasig, Philippines | jonrenzotoledo0303@gmail.com | <https://renzo-webportfolio.netlify.app/> | github.com/jonrenzo

SUMMARY

Full-stack developer experienced across web, mobile, and embedded systems, with production work spanning Next.js/TypeScript ERP platforms, OCR and computer-vision pipelines, and React Native/Expo apps. Comfortable owning a feature end-to-end — from database schema and API design through frontend implementation and deployment.

EDUCATION

PAMANTASAN NG LUNGSOD NG PASIG

BS Computer Science

Consistent Dean's and President's Lister

Pasig

2022 – 2026

RIZAL HIGH SCHOOL

Senior High School – STEM

Pasig

2020 – 2022

WORK EXPERIENCE

TELCOVANTAGE PHILIPPINES

Software Developer

Taguig

Feb 2026 – June 2026

- Built an OCR/CNN-based plan-analysis tool (Flask backend, Next.js/TypeScript frontend) that automatically reads strand numbers and detects equipment shapes from DXF/PDF as-built engineering drawings
- Designed a versioned REST API (/api/v1) exposing OCR results, pole IDs, and equipment detection data for integration with external GIS and billing systems
- Reduced manual plan-analysis time by automating strand-digit OCR with confidence-based review flagging, cutting down human error in field data processing

SANDMAN SOFTWARE SYSTEMS INC.

Junior Software Developer Intern

Quezon City

Jul 2025 – Dec 2025

- Developed and maintained web applications using CodeIgniter, and migrated legacy systems from CodeIgniter 1.3 to CodeIgniter 3, improving maintainability, security, and performance
- Debugged and optimized application code to resolve issues, enhance efficiency, and reduce system downtime

KADENCE INTERNATIONAL

Operations Intern

Ortigas

Jun 2023 – Aug 2023

- Conducted quality assurance checks on interview processes and collected data to ensure accuracy and consistency
- Identified discrepancies and inconsistencies, contributing to improved data reliability and reporting accuracy

PROJECTS

TELCOVANTAGE ERP SYSTEM

2026

- Built a full-stack internal operations platform for TelcoVantage Philippines covering vendor accreditation, procurement/PO governance, supplier payables, CRM, HR, assets, and audit logging, using Next.js, React, TypeScript, and Supabase (Auth, PostgreSQL, RLS, Storage, Realtime)
- Integrated a Gemini-powered AI assistant for vendor/PO lookups, compliance summaries, and AI-assisted CSV/Excel import mapping, plus a role-based capability system with automated vendor emails and document-expiry reminders

TELCOVANTAGE SITE MAP READER

2026

- Developed a full-stack engineering tool (Flask + trained CNN backend, Next.js/TypeScript frontend) that reads strand numbers and detects equipment shapes from DXF/PDF CAD drawings
- Exposed a versioned REST API for OCR results, pole IDs, and equipment detection for consumption by external GIS and billing systems

MEDISYNC INVENTORY & FORECASTING SYSTEM

- Built a full-stack medical inventory and demand-forecasting system (Next.js, Supabase, FastAPI) with an ARIMA-based module (Statsmodels, Pandas) to predict medicine consumption and flag overstock/understock risk
- Implemented barcode-scanner-integrated stock tracking with real-time quantity updates and dispensed-item logging

ADDITIONAL

Technical Skills: Python, PHP, JavaScript/TypeScript, Next.js, React, Node.js, CodeIgniter (MVC), HTML/CSS, RESTful APIs; OCR, Computer Vision, ARIMA Forecasting, Data Modeling, Prompt Engineering; MySQL, MongoDB, Supabase (PostgreSQL); Git, GitHub, VS Code, Postman

Languages: English, Filipino
